SUMMARY

BE Automation & Robotics engineer with hands-on work in robot design, simulation, and customer-facing product demos. Designed a 5-DOF manipulator in Fusion360 with 3D printing and gesture teleoperation, and supported **120+ investor outreaches** and **200 beta users** with live walkthroughs. Targeting **Presales / Technical Sales Engineer (Robotics & Manufacturing)** fresher roles: demos, discovery, POC support, and enablement. Willing to travel for field demos and site visits.

EDUCATION

- **BE Automation & Robotics** 2022 – 2026
Modern Education Society's Wadia College of Engineering – 8.3 CGPA Pune, Maharashtra
 - **Relevant Coursework:** ROS2, Computer Vision, Artificial Intelligence, Robot Kinematics and Dynamics

PROJECTS

- **DeX: Manipulator** | *Fusion360, Arduino, ESP32, 3D Printing*
 - Designed a 5-DOF robotic manipulator in Fusion360 and fabricated it via 3D printing; demonstrated gesture-controlled teleoperation with flex-sensor hand tracking over an Arduino + ESP32 wireless link.
- **Simulated Robot Pick-and-Place POC** | *Python, Webots*
 - Built a simulation POC for pick-and-place of a 5-DOF Franka-style arm in Webots; compared task sequencing and recovery across runs to scope a small trial around a clear task.

WORK EXPERIENCE

- **Software Engineer** Sept 2024 – Jan 2026
CryptoPrism (Trinity Infotech) Pune, Maharashtra
 - Supported **120+ investor outreaches** and **200 beta users** via live walkthroughs in plain language; helped cut cloud cost by nearly **30%** while improving reliability.
- **Mechanical Design Intern** Aug 2021 – Oct 2021
Space Technology and Aeronautical Rocketry (STAR) Virtual
 - Selected as the youngest member in a team of researchers and masters students to design and simulate a static test pad for solid rocket motors; built and demonstrated a working POC with simple rockets.

SKILLS

Presales / Field: Product Demos, Discovery & Requirements Capture, POC Support, User Onboarding, Feedback Loops, Value & ROI Explanation, Stakeholder Communication

Robotics & Design: Fusion360, 3D Printing & Rapid Prototyping, Arduino, ESP32, ROS2 (familiar), Webots, Robot Kinematics and Dynamics, Computer Vision (coursework), Blender 3D (familiar)

Software Base: Python, SQL, Linux, Git, REST APIs (basics), Docker (basics)

CERTIFICATIONS

- CS50 Introduction to Python – Harvard University

LEADERSHIP & SOCIAL ENGAGEMENT

- **Co-founder, Avinya Club:** Founded project-focused club for hackathons and technical development at MESWCOE Pune
- **Technical Head, ASME Student Chapter:** Led technical initiatives and projects as head of American Society of Mechanical Engineering Student Chapter at MESWCOE Pune

INTERESTS & HOBBIES

Reading: Non-fiction, Physics, Philosophy, Astronomy, Science Fiction | Working out, Personal Finance | Presentations (Figma)
